

2026 Best AI Awards

International Track Finalists

Categories	Group	Project
AI Application (AI 應用類)	Student (學生組)	AI-Assisted Detection of Osteoporotic Vertebral Compression Fractures on Chest and Abdominal Radiographs
		ARIA — Automated Reconciliation & Invoice Intelligence Agent
		BeMyEyes
		BlackCore AI — Factory Intelligence Operating System
		CIRCULARX-Global Circular Economy & Intelligent Manufacturing Platform
		EaseAI: AI Motion Tracking Sensor and Intelligent Assistive System for Nursing Home
		HAIRTOOL AI: An Agentic Multi Modal AI Platform for Early Stage Hair Loss Detection and Personalized Recovery
		KneeSense: AI-Driven Visuotactile System for Wearable Knee Motion Assessment
		Manosense
		MedCheckAI: AI-Powered Pill Identification, Drug Interaction Risk Analysis, and Real-Time Pharmacist Consultation Platform
		MRI-based Regional Bone Quality Index for 3D Vertebral Assessment using AI
		NanoSentry: Multi-Modal Edge AI for Real-Time Semiconductor Yield Optimization
		NeuroForge
		Rice Field Lodging Detection using Machine Learning on UAV Images
		Robotsave Gebox
		SERENOVA — AI-Orchestrated Pregnancy & Postpartum Care System
		SolarFrost AI
		STROKELYTICS: AI-Powered 3D Stroke Subtype Analysis & Visualization Tool
		Verilog HDL Agent: AI-Driven RTL Verification and Debugging Automation Platform
		VESPER: AI-Powered Semiconductor Export Control Classification & Supply-Chain Intelligence Platform
Visture		
X-IRDrop A Prescriptive Explainable AI Framework for Automated IR-Drop Mitigation and ECO Guidance		

2026 Best AI Awards

International Track Finalists

Categories	Group	Project
AI Application (AI 應用類)	Company (國際企業組)	BMS4Car
		Civil Intelligent Sensing System
		Eko Agentic: Data Analyst
		EQX Flow
		OWEN (Overwatch & Engagement Network)
		Physical AI Drone Platform for Autonomous Industrial Fire and Safety Monitoring
		PRIMS: AI-Powered Contactless Motor Assessment for Parkinson's Disease
		SanPay – AI-Powered Geospatial Carbon Wallet for Sustainable Economies
		TeroAtlas Data System
		The PathKeeper™ Full Spine Navigation System
		Vibe-checker
IC Design (IC 設計類)	Student (學生組)	EarECG - CLIC
		MambaEdge: Early Warning for Brain Abnormalities
		SubvoX: A Wearable Silent Speech Interface Using Edge Neural Acceleration
IC Design (IC 設計類)	Company (國際企業組)	AIDE-Chip: Explainable AI Engine for 800× Faster Microarchitecture Exploration in IC Design
		AIYO Engine
		Amigo-LLM: Cutting Analog ERC Sign-off from Months to Days
		ANN1000 Analog Neural Network
		SecondSight - AI Smart Glasses for the Visually Impaired
